3. INFORMATION ON FISSION

3.1 Mineral assets of Fission

The net profit/(loss) before and after tax of Fission for the three financial years ended 30 June 2013, 2014, 2015 and the three months ended 30 September 2015 is summarized as below:

	For the year ended 30 June			For the three months ended 30 September
	2013	2014	2015	2015
	(audited)	(audited)	(audited)	(unaudited)
	(CDN\$ million)	(CDN\$ million)	(CDN\$ million)	(CDN\$ million)
Net profit/(loss) before taxation	(6.10) (equivalent to approximately HK\$33.92 million)	(4.09) (equivalent to approximately HK\$22.74 million)	(8.37) (equivalent to approximately HK\$48.54 million)	(3.57) (equivalent to approximately HK\$19.85 million)

3.3 Off-take arrangement and undertaking given by Fission

The Company will enter into the Off-take Agreement with Fission concurrently with the Share Subscription Agreement. Pursuant to the Off-take Agreement, the Company is entitled to acquire Off-take Quantity from Fission under the terms and conditions in the Off-take Agreement, details of which are as below:

- (i) Product: U_3O_8
- (ii) Volume: 20% of the annual production from Fission, and, at the Company's option, an additional 15% of the production from Fission
- (iii) Price: at a discount rate as agreed by both parties by reference to TT and UxC spot price indexes at the time of delivery

Pursuant to the Off-take Agreement, Fission undertook to the Company that it would use commercially reasonable efforts to obtain any and all licenses or other authorizations that may be lawfully required by any agency of any government in order that Fission can legally sell and deliver the U_3O_8 to the Company as provided in the Off-take Agreement.

4. REASONS FOR AND BENEFITS OF THE ACQUISITION

The Board primarily considers the following reasons and benefits in determining the Acquisition:

4.1 Strong increasing trend of natural uranium market

The global increasing demands for clean energy in large scale will promote more and more countries to develop nuclear energy. Natural uranium is a key element to nuclear power production. In the long run, it is expected that the increase in nuclear power plants in the world will further instigating the natural uranium demands.

4.2 Favourable market opportunity for the Acquisition

Fission has seen continuous breakthrough in its exploration businesses and high quality resources (high in quality and shallowly buried) explored by it have been increasing. While ever since the Fukushima event in Japan, the stagnancy in building nuclear power plants resulted in a continuing decrease in natural uranium price, affected by which, the stock price of Fission is currently at a relatively low point. The current market value of Fission is far lower than the net present value ("NPV") estimated for its mineral assets in the Preliminary Economic Assessment ("PEA") published by it in September 2015. Therefore, the Board believes that the estimated value of Fission is appealing for the Acquisition as compared with other comparable companies in the market.

4.3 Joint willingness in cooperation

Both the Company and Fission have strong wills to cooperate because the cooperation is complementary for both sides and can achieve synergy between the two companies. From the perspective of Fission, the Acquisition will enable it to introduce its first strategic investor, to lay a solid foundation for the development and financing of its future projects, and to acquire a stable sales channel according to the Off-take Agreement. From the perspective of the Company, the Acquisition will enable the Company to share the benefits of future development of Fission, and to acquire 20% of its annual production, and, at the Company's option, an additional 15% of the production from Fission at a discount price, which provides the Company a stable product supply channel.

4.4 Facilitating the Company's sustainable development

Fission's primary asset-the PLS Property, is the world third largest high quality uranium deposit and the world largest undeveloped uranium deposit, the discovery of which is one of the most significant findings in the global uranium resources field. As of the date of this announcement, the Company only owns one uranium deposit under production-the Semizbay Mine in the Republic of Kazakhstan. It is expected that the Company will control another uranium deposit at the exploration stage through the Acquisition, which can help the Company to build a consummate project-developing team, and lay a more solid foundation for the Company's sustainable development.

4.5 Further investments in Canada

As the Company's first uranium investment project in Canada, the Acquisition can enrich our experience in resources exploration in Canada. Through the Acquisition, the Company will have a better understanding of high quality uranium resources projects, as well as the environment and policies for investments in Canada, which will improve the Company's capability of exploring resources.

Considering the above, the Directors are of the view that the terms of the Share Subscription Agreement are fair and reasonable and in the interests of the Company and the Shareholders as a whole.

5. LISTING RULES IMPLICATIONS

As the highest applicable percentage ratio in respect of the Acquisition exceeds 25% but is less than 100%, the transaction contemplated under the Share Subscription Agreement will constitute a major transaction of the Company pursuant to Rule 14.06(3) of the Listing Rules and is therefore subject to the notification, announcement and Shareholders' approval requirements under the Listing Rules.

To the best of the Directors' knowledge, information and belief having made all reasonable enquiries, no Shareholder has any material interest in the Acquisition and no Shareholder is required to abstain from voting if the Company were to convene a general meeting for the approval of the Share Subscription Agreement. As such, the Share Subscription Agreement may be approved by written Shareholders' approval in accordance with Rule 14.44 of the Listing Rules.

The Company intends to obtain written Shareholders' approval from China Uranium Development who holds 2,974,347,826 Shares, representing approximately 64.15% of the issued share capital of the Company as at the date of this announcement. Accordingly, no general meeting for the Shareholders' approval of the Acquisition will be held. Further announcement(s) in this regard will be published in due course.
